EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 36-38 and 40-45, to group II non-elected without traverse. Accordingly, claims 36-38 and 40-45 have been canceled.

In the computer-readable form of the Sequence Listing, Seq 19, changed (A) LENGTH: response to "20".

The following is an examiner's statement of reasons for allowance:

Ponnazhagan et al is cited as of interest in providing data for ex vivo transfection and in vivo gene expression using a vector as claimed. Ponnazhagan et al found that the recombinant mRNA was expressed at level of 4-6% of endogenous host β^{major} -globin, which appears to be 2-3 times the level cited as prevalent in the retrovirus prior art (in the specification). So, even apart from the issues of motivation to combine the elements in the prior art, this constitutes an unexpected improvement in expression compared to the prior art vector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
